PROJECT STATEMENT

OBJECTIVE

To develop a Candidate Management System for HR.

Abstract of the project:

HR Management System allows us to add, view and delete candidates in the system. The

status of the candidate (Status: Selected-R1, Selected-R2, Rejected and Onboarded)

Functional requirements:

1) Provide option to add/remove/delete a new candidate and resume.
2) Provide option to capture and search Name, Email_Id, Phone_Number, Source, Status, Resume.
3) Identify when a duplicate resume / candidate is added to the system.

Technologies to use:
Html, Angular, C#, MSSQL (its mandatory to use these technologies)

Notes:
- Feel free to use other technologies along with the above ones.
- The listed requirements are basic features of the application. Bring innovations to the project as you like.
